

REACH COMPLIANCE STATEMENT 2020- OPTEK SYSTEMS

OpTek Systems is fully aware of the legal requirements under REACH (Registration, Evaluation, Authorisation and Restriction of Chemicals) regulation (EC), which originally came into force in 2007 to protect human health and the environment.

Under REACH, OpTek Systems is not required to pre-register or register substances or articles as defined by REACH because the company:

1. Not import or produce such substances above the defined threshold of 1 tonne per year.
2. Has not identified any materials in its substances or products that are included in the ECHA Candidate list, which covers substances of Very High Concern >0.1% (w/w) and are compliant with Annex XVII restrictions. The latest version of the candidate list can be found at:
<https://www.echa.europa.eu/candidate-list-table>

This statement refers to the latest updated candidate list at the time of product shipment. OpTek Systems will continue to monitor the Candidate List and Annex XVII for new additions and will notify our customers should our products contain any SVHCs.

Dr Mike Osborne, CEO
OpTek Systems
